

Year 3 - Curriculum - Week 2

You can choose the order of the learning or do it in the order given.

	Activity 1	Activity 2	Activity 3	Activity 4	Activity 5
Subject	<p>Geography Countries. Revisit the "Mapping our World" resource we used in school and find the location of different countries in the world. Google Maps can help if you get stuck.</p>	<p>Science Plants. Discover the different ways plants disperse seeds; Wind, explosion, water and animals. Watch the videos in the links above and create a poster explaining the four different ways. If you need a template, see below for a poster template. You don't have to use this though if you have your own ideas. It could be landscape if you like.</p>	<p>History <u>Life in the Iron Age.</u> We have come to the end of learning about life between 800BC - 43AD and now prepare for the Roman invasion. BBC Bitesize introduces the skills you need to be a historian. Think about the artefacts archaeologists may find from the Iron Age. Complete Activity 2 on the BBC Bitesize History page. Take a virtual tour of the British Museum. What artefacts can you find from Roman times?</p>	<p>Art <u>Drawing a 3D box.</u> Watch this short tutorial on YouTube. Focus on light source - where does the light come from and where does it make shadows? Practise the use of shading. You could try drawing many different boxes and change the way you shade. How did you get on with last week's task? Can I put your art on the school website? See below for Mr Spalding's effort.</p>	<p>Music <u>Music appreciation.</u> On Sunday 19th April, BBC One showed "One World: Together At Home" where many musicians performed from their own home to unite and celebrate workers on the frontline of Covid-19. Perhaps you watched some of it. (You can follow the link above and listen again) Choose one or two of the artists and listen to more of their songs. You may already be a fan. Write down how the music makes you feel or draw a picture of something whilst listening to the songs. I'd love to see some photos of your work!</p>
