<b>10 minutes</b>	Practice on Times Table Rock Stars for 10 minutes a day				
<b>Mathematical talk</b>	Look at day 1 Mental Maths varied fluency - What does the 3 represent? What does the 6 represent? What does 'lots' of mean (equal groups)? E.g. 3 lots of 2 = 6 or $3 \times 2 = 6$ . Discuss does $18 = 3 \times 6$ . How is $6 + 6 + 6$ the same as $3 \times 6$ ? How is it different?				
<b>Themes</b>	Multiplication sentences using the symbol	Multiplication sentences using the symbol	Use arrays	Use arrays	The 2 times table
<b>Mental Maths Varied fluency</b> <i>Answers are all below on a table</i>	Look at the sets of 6 - how many are there? 3 lots of 6 is the same as $3 \times 6$ . Draw 3 set of 2. Write the addition and the multiplication.	True or false? All of the number sentences have the same answer. See below.	Explain is this correct $3 + 3 + 3 = 3 \times 3$ See below. Look at the cakes on the plates. What does the 4 represent? What does the 3 represent? What does the 12 represent?	Look at the train image below on day 4. Look at the number sentences and explain why they can all be true.	Look at the box of eggs below. Where are the 2 lots of 5? Where are the 5 lots of 2? What do you notice? What can we use to represent the eggs? Can you draw the image?
<b>Problem/ activity of the day</b> <i>Answers are all below</i>	a) Look at the boxes of chocolates - how many are in each box (they are equal). Complete the addition and multiplication. b) count the cubes how many are in each group. c) count how many stems of flowers are in each bunch. <b>Hint: tick and count carefully - you can use counters or pasta pieces to make the groups to find the totals.</b> Watch this clip which will help if you can, click on the link: <a href="https://vimeo.com/418150502">https://vimeo.com/418150502</a>	2) complete the repeated additions and matching multiplication. 3) complete the number pattern, what comes next. <b>Hint: look at all of the sentences first to spot the pattern.</b> 4) what is the total of 16 (think about counting in 2's) How many lots of 2 make 16? 5) Use counters or pasta to make: a) 3 lots of ? make 12 b) ? lots of 4 make 8 c) 2 lots of ? make 5	Questions 1- 4 Count the equal groups - how many is in each group.
