Dear all,

World Space Week is a UN declared celebration of space held annually, every October 4 to 10. It is the largest space event on Earth, with over 8,000 events reported in 2019 and held in 96 countries. Every year, World Space Week Association selects a theme as a guidance for celebration. Our 2020 World Space Week is dedicated to satellites and their broad benefits under the theme "Satellites improve life." With this theme, the World Space Week will show the importance of satellites in daily life and how our lives are affected by satellites such as in communications, environmental monitoring, transportation, weather forecasting, telemedicine, science, and in many other ways.

We will be taking part in special Science lessons during this week exploring the importance of satellites and researching how they have improved life on Earth.

To celebrate World Space Week 2020, we will be running a whole school competition asking you to design your own 2D or 3D satellites. Entries to be handed in by **Wednesday 16th October 2020** in order to quarantine before sharing in class. Please label with name and class. Prizes to be presented in Rainbow Assembly the following week.

If you have any questions please ask Miss Holmes. Entries must be clearly labelled with your name and class. There will be 1st, 2nd and 3rd place prizes for EYFS-KS1 and KS2 as well as a family prize for those of you who would like to enter as a family.

Please see below for 2D and 3D entry templates. If you would either of these printed off, please contact Miss Holmes via the Year 6 support email year6@stjosephs.greenwich.sch.uk.

**World Space
Week** OCTOBER 4-10

We look forward to seeing your entries.

Many thanks,

Miss Holmes.

Design a 3D Satellite Craft Activity

Challenge: Using a range of 2D and 3D shapes, create your own model of a satellite.

Remember to include a way to communicate back to Earth and sensors to detect the temperature and wavelengths. You may like to include an imaging camera and add 2D shapes to craft sticks to increase the rigidity of your satellite.
